

## ***PHARMA VET LTD. SHUMEN***

Pharma Vet Ltd. - Shumen is a fast-growing pharmaceutical manufacturer. Producing more than 30 licensed products, which meets the good manufacturing practices, Pharma Vet offers veterinary medicines; fodder; milk substitutes; biocides. The company is, also, a producer of more than 40 different types of sanitary hygienic preparations, registered with the Ministry of Health.

In 2011 the Company started producing granulated pet foods and in 2017 - the construction of a modern production line for sterile injectable forms was initiated, , in line with the highest quality standards.

Pharma Vet Ltd. operates on 4 production sites, a commercial warehouse and a well-developed transport and distribution network, ready to deliver anywhere in Bulgaria. We deliver with our own transport means, on weekly schedule for the individual regions, but if necessary, we also execute express orders, throughout the services of the national courier companies.

Combining high quality, affordable prices and adhering to the principles of correctness and accuracy, Pharma Vet Ltd. aims at a valuable partnership with its clients.

**Veterinary medical preparations, powders / sachets for internal use, for domestic animals / antibiotics and sulphonamides.....**

1. Gentamicin pulvis
2. Oxytetracycline /ATC/ 20%
3. Terramycin farma /ATC/ 5%
4. Sulfachlorpyrazin – Natrium /SHP/ 30%
5. Oxytetravit /OTC+ vitamins/
6. Doxycycline 20 % pulvis
7. Tylofarm
8. Oxytetramulin /OTC + tiamulin/
9. Tetraneovit /OTC + neomycin + vitamins/
10. Biostim
11. Genta + vitamins-/Gentamicin + vitamins

**Veterinary medical preparations in the form of powders / sachets for internal use, for exotic animals and pigeons /antibiotics and sulfonamides**

1. Metronidazol 10%
2. Metronidazol forte 99%
3. Genta + vit /gentamicin + vitamins/
4. Oxytetravit
5. Oxytetracycline 50%
6. Oxytetracycline 100 %
7. Sulfachlorpyrazin – Na 100 %
8. Sulfachlorpyrazin – Na 30 %
9. Gentamicin
10. Colitetravit
11. Ampicillin
12. Tilocycline /tylosin + chlortetracycline + vitamins/
13. Colistin
14. Enterogard farma
15. Vitafur
16. Tiamol 45
17. Tilodoxin – vita
18. Ornivit
19. Furaltadon 6
20. Doksymulin
21. Chloramphenicol 5%
22. Paramycsovit
23. Ronidazol 10 %

24. Ronifur /ronidazol + furaltadon/
25. Doxycyclin
26. Tetraneovit
27. Biostim
28. Ornivit
29. Streptomycin
30. Sulfaguanidine
31. Tylofarm
32. Sulfathiazole
33. Gentamicin forte

**Liquid forms for internal use, for domestic animals**

**- Anti-parasitic veterinary medical preparations**

1. Albendazole 10%
2. Piperazine 20%

**- Vitamin veterinary medicine preparations**

1. Selenium E farm
2. Maxivit

**- Others**

1. Enrofloxacin – antibiotic /antimicrobial/
2. Pharmacox – anticoccidial

**- Liquid forms for internal use, for exotic animals and pigeons**

1. Selenium E farm
2. Piperazine 20%
3. Enrofloxacin
4. Pharmacox
5. Maxivit

**- Veterinary medicine preparations for external use for the treatment of wounds and skin diseases**

1. Oxytetra spray - farm animals
2. Oxytetra spray – pigeons and exotic animals
3. Ectolucyl spray – farm animals
4. Ectolucyl spray – pigeons and exotic animals
5. Tetraneocort spray

6. Neomycin spray
7. Neocubitol spray
8. Pix Ecto spray
9. Neobacin spray
10. Ichthyol spray
11. Exefarm spray
12. Granufarm spray – farm animals
13. Granufarm spray – pigeons and exotic animals
14. Granufarm liquidum – farm animals
15. Granufarm liquidum – pigeons and exotic animals
16. Iodine spray
17. Chayavet Lavenda spray
18. Chayavet Terpenta spray
19. Neobacin emulsion
20. Neobacin powder
21. Oxytetra powder
22. Ecto eczema
23. Dog eczema
24. Exefarm C
25. Ichthiol drops
26. Ocolofarm eye drops – pigeons and exotic animals
27. Ocolofarm eye drops – dog/cat
28. Gentamast – intramuscular syringe

**Vitamins for internal use in the form of powders / sachets, for domestic animals**

1. Vitatonic
2. Polyvit
3. Ovostim

**Insecticidal preparations**

1. Cypermethrin – environment
2. Cypermethrin farma – farm animals
3. Ectociper
4. Ectomin
5. Favorit Farma
6. Nuvan farma – farm animals
7. Nuvan Colombo – pigeons and exotic animals
8. Diacidol

9. Deltametrin Colombo – pigeons and exotic animals
10. Deltafarm – farm animals
11. Bendita
12. Proteyt Colombo
13. Aycol Colombo
14. Tetrazine
15. Triocil
16. Carbatril
17. Carbaril
18. Permetrin spot on

**Veterinary medical preparations for control over ticks, fleas, lice and others, in the form of powders, sprays and shampoos for pets**

1. Ectomin spray
2. Opigard spray
3. Break Pro powder – dog/cat
4. Opigard powder – dog
5. Break pro shampoo
6. Permetrin shampoo – dog/cat
7. Permetrin shampoo – dog
8. Permetrin shampoo – cat
9. Pics Ecto shampoo

**Veterinary medical preparations for control over ticks, fleas, lice and others, in the form of powders, sprays and shampoos for pigeons and exotic animals**

1. Nuvan Colombo spray
2. Gard powder
3. Opigard powder for decorative
4. Carbaril spray

**Milk replacers and complementary feed**

1. Milk replacer Mixomec
2. Milk replacer Cavilak
3. Milk replacer Extra milk
4. Milk replacer Milki lac
5. Milk replacer Lactolen
6. Milk replacer Pectolac
7. Dicalcium phosphate
8. Lactica

9. Coco stim
10. Pile stim (chicken)
11. Prasi stim (pig)
12. Tele stim (calf)
13. Krave stim (cow)
14. Agne stim (lamb)
15. Favorite for cats
16. Favorite for dogs
17. Favorite for lamb, goatling
18. Favorite for chicken broiler
19. Favorite for laying hens
20. Favorite for dairy cows
21. Favorite for sheep, goats
22. Favorite for small pigs
23. Favorite for sows
24. Favorite for pigs for fattening
25. Favorite for calves
26. Premium BKK laying hens
27. Premium BKK dairy cows
28. Premium BKK chicken broiler
29. Premium BKK pigs for fattening
30. Premium Dog
31. Premium Cat
32. Energy Dairy cows
33. Energy Hens
34. Energy Pigs for fattening

#### **COSMETIC PRODUCTS AND OILS**

1. "Moroccan gold" shampoo /argan oil+AD3E/
2. Almond shampoo /almond oil +AD3E/
3. Coconut shampoo /coconut oil + AD3E/
4. Macadamia shampoo /macadamia oil+AD3E/
5. Avocado and grape seeds shampoo / avocado and grape seeds oil + AD3E/
6. Shea butter shampoo / shea butter + AD3E/
7. Keratin shampoo / keratin + AD3E/
8. Aloe Vera shampoo /aloe vera+AD3E/
9. Vital shampoo /AD3E/

**Veterinary medical preparations, powders / sachets for internal use, for domestic animals / antibiotics and sulphonamides/**

**Gentamicin**

Broad spectrum antibiotic with bactericidal action on Gram-positive and Gram-negative microorganisms such as staphylococci, streptococci, colibacteria, proteus, brucellosis, salmonella, etc., including antibiotic-resistant microorganisms. It is used in digestive infections.

**Active substance:** gentamicin sulfate.

**Target animals:** pigs and calves

Reg. № 0022-2521/ 03<sup>rd</sup> April 2015

**Oxytetracycline 20%**

Bacterial enteritis in pigs, leutisporosis in sow-mothers; in calves for treating bacterial enteritis; in sheep for the treatment of bacterial enteritis; in poultry for the treatment of infectious sinusitis; in turkey for the treatment of hexamethosis, for the treatment of infectious sinusitis, for the treatment of microbial complicated transmissible and coronavirus enteritis; fish for the treatment of furunculosis and haemorrhagic septicemia.

**Target animals:** cattle, sheep, pigs, poultry and fish

**Active substances:** oxytetracycline hydrochloride.

Reg. №: 0022-2570/ 04<sup>th</sup> June 2015

**Oxytetracycline 5%/ terramycin**

Bacterial enteritis in pigs, leutisporosis in sow-mothers; in calves for treating bacterial enteritis; in sheep for the treatment of bacterial enteritis; in poultry for the treatment of infectious sinusitis; in turkey for the treatment of hexamethosis, for the treatment of infectious sinusitis, for the treatment of microbial complicated transmissible and coronavirus enteritis; fish for the treatment of furunculosis and hemorrhagic septicemia.

**Target animals:** cattle, sheep, pigs, poultry and fish

**Active substances:** oxytetracycline hydrochloride.

Reg. №: 0022-2569/ 04<sup>th</sup> June 2015

**Sulfachlorpyrazin Natrium 30%**

Intended for the treatment of coccidiosis in chickens, turkeys, rabbits, sheep, goats, lambs and calves; typhus-pullorosis, infectious colds and necrotic enteritis in chickens.

**Active substances:** Sulfachlorpyrazin Natrium

**Target animals:** chickens, turkeys, hens, rabbits, calves, lambs and kids

Reg. №: 0022-1485/ 19<sup>th</sup> October 2015

**Oxytetravit /animals/**

Powder for application in drinking water. Birds: Treatment of infectious synovitis and infectious aerosaculitis, treatment of cholera and other bacterial infections. Pigs: treatment of bacterial enteritis, leptospirosis in pigs-mothers and other bacterial infections. **Target animals:** birds, turkeys, pigs. **Active substances:** Oxytetracycline hydrochloride, vitamins: A, D3, E, K, C, B1.  
License for use № 0022-2668  
Reg. № 0022-2222/13<sup>th</sup> March 2014

### **Doxycycline 20%**

Used to treat infections of the respiratory and gastrointestinal tract, caused by microorganisms, sensitive to doxycycline. **Active substances:** doxycycline hyclate.  
**Target animals:** birds, pigs and calves.  
Reg. № 0022-2222/ 13<sup>th</sup> March 2014

### **Tylofarm /animals/**

For the treatment of infections of the gastrointestinal tract, caused by tylosin-sensitive microorganisms, namely: streptococci, staphylococci, corynebacteria, reddish pathogen, leptospira and certain brucellosis strains. **Active substances:** tylosin tartrate.  
**Target animals:** birds and pigs.  
License for use № 0022-2666

**Oxytetramulin:** Intended for the treatment of primary and secondary bacterial infections of the respiratory and gastrointestinal tract caused by Gram-positive and Gram-negative microorganisms, mycoplasmas and leptospire. **Active substances:** Oxytetracycline hydrochloride, thiamulin hydrogen.  
**Target animals:** pigs  
Reg. № 0022-1663/ 17<sup>th</sup> November 2011

**Tetraneovit:** It is used to treat infections, caused by oxytetracycline and neomycin sensitive microorganisms - bacterial enteritis in chickens, calves, pigs and other respiratory

mycoplasmosis; infectious synovitis and sinusitis in birds; against histomoniasis in turkeys.

**Active substances:** Oxytetracycline hydrochloride, neomycin, vitamins.

**Target animals:** calves, lambs, goats, pigs and birds.

Reg. № 0022-1950/ 26<sup>th</sup> February 2013

**Biostim (animals):** For treatment of gastrointestinal, respiratory and other infections - paratyphoid, edema, bronchopneumonia in pigs; pullorum disease, cholera, chronic respiratory disease and coccidiosis in birds. **Active substances:** chlortetracycline hydrochloride.

**Target animals:** pigs and birds.

License for use № 0022-2667

**Genta + vit:** Used for digestive infections, urinary and lung infections, against respiratory mycoplasmosis, sepsis. Promotes growth and sexual function.

**Active substances:** gentamicin sulfate, vitamins.

**Target animals:** pigs.

### **Veterinary medical preparations in the form of powders/sachets/ for internal use, for exotic animals and pigeons /antibiotics and sulphonamides/**

**Ampicillin:** It is used in diseases caused by ampicillin susceptible microorganisms - in bronchopneumonia, gastrointestinal diseases, caused by salmonella and escherichia coli. In pasteurellosis and spirochaetosis in avian species.

**Active substances:** ampicillin hydrate.  
**Target animals:** pigeons.

**Colitetravit:** A combination of oxytetracycline hydrochloride, colistin sulfate, a balanced vitamin complex, against chlamydia, mycoplasma for prophylaxis and treatment of diseases caused by Gram-negative, sensitive bacteria.

**Active substances:** oxytetracycline hydrochloride, colistin sulfate, vitamins.  
**Target animals:** pigeons.

**Doxycycline:** It is used to treat infections of the respiratory and gastrointestinal tract caused by microorganisms sensitive to doxycycline.

**Active substances:** doxycycline hyclate, dextrose.  
**Target animals:** pigeons.

**Enterogard:** Effective on various microorganisms, causing infections on the gastrointestinal mucosa and intestine, suitable for the treatment of primary and secondary infections caused by microorganisms sensitive to the combination of metronidazole, oxytetracycline, furalthadone etc.

**Active substances:** metronidazole, oxytetracycline hydrochloride, vitamins.  
**Target animals:** pigeons.

**Gentamicin forte:** Used in digestive infections, in urinary and lung infections, against respiratory mycoplasmosis, sepsis. The vitamin complex increases resistance during and after illness, improves metabolism, increases appetite, reduces apathy and fatigue.

**Active substances:** gentamicin sulfate, vitamins.  
**Target animals:** pigeons.

**Biostim:** Used for the treatment of gastrointestinal, respiratory and other infections, for ornithological therapy and generalized bacterial infections, for metabolism and resistance.

**Active substances:** chlortetracycline, vitamins.  
**Target animals:** pigeons.

License № 0022-2667/ 18<sup>th</sup> July 2016

**Doxymulin:** Used to treat primary and secondary bacterial infections of the respiratory and gastrointestinal tract, caused by Gram-positive and Gram-negative microorganisms.

**Active substances:** doxycycline hyclate, thiamoline hydrogen fumarate, vitamins.

**Target animals:** pigeons.

**Gentamicin:** It is used for digestive infections, urinary and pulmonary infections, respiratory mycoplasmosis, sepsis.

**Active substances:** gentamicin.

**Target animals:** pigeons.

**Colistin:** Used in intestinal infections, caused by Gram-negative and colistin-sensitive bacteria.

**Active substances:** colistin sulfate.

**Target animals:** pigeons.

**Metronidazole:** Acts on antiprotozoal on histomonas, trichomonas, lamblia intestinalis, amoeba. It has a systemic antiprotozoal effect. Its toxicity to birds is low.

**Active substances:** metronidazole.

**Target animals:** pigeons.

**Gentavit:** It is used to digestive infections, urinary and pulmonary infections, respiratory mycoplasmosis, sepsis.

**Active substances:** gentamicin, vitamins.

**Target animals:** pigeons.

Reg. № 0022-1587/ 08<sup>th</sup> June 2011

**Oxytetracycline 50% + vitamins:** Used for the treatment and prevention of infectious diseases of the gastrointestinal tract, respiratory and urogenital pathways, arthritis and secondary bacterial infections due to viral diseases.

**Active substances:** oxytetracycline hydrochloride.

**Target animals:** pigeons.

**Oxytetracycline 95%:** Used for the treatment and prevention of infectious diseases of the gastrointestinal tract, respiratory and urogenital pathways, arthritis and secondary bacterial infections due to viral diseases.

**Active substances:** oxytetracycline hydrochloride.

**Target animals:** pigeons.

**Tetraneovit:** Used to treat infections caused by oxytetracycline and neomycin-responsive microorganisms. Chronic respiratory diseases, synovitis and sinusitis.

**Active substances:** oxytetracycline hydrochloride, neomycin, vitamins.

**Target animals:** pigeons.

**Vitafur:** It is used to treat infections, sensitive to oxytetracycline, neomycin and furaltadone. Suitable for the treatment of intestinal, respiratory and urogenital diseases.

**Active substances:** neomycin sulfate, oxytetracycline hydrochloride, furaltadone, vitamins.

**Target animals:** pigeons.

**Sulfachlorpyrazin 30%:** Used to treat coccidiosis, a contagious fever.

**Active substances:** Sulfachlorpyrazin - sodium monohydrate.

**Target animals:** pigeons.

**Sulfachlorpyrazin 100%:** It has a wide range of action that encompasses all types of mumps, that cause coccidiosis, as well as Pasteurella multocida, Salmonella gallinarum pulorum.

**Active substances:** sulfachlorpyrazin - sodium monohydrate.

**Target animals:** pigeons.

**Tiamol:** It is used for therapy and prophylaxis of respiratory tract diseases, caused by mycoplasmas, E-coli, haemophilus galinarum and passorelle.

**Active substances:** Tiamulin hydrogen fumarate.

**Target animals:** pigeons.

**Tyloxin vita:** An extremely effective combination for treating respiratory problems. It is intended for the treatment and prophylaxis of mycoplasmosis, clambia, ornithosis.

**Active substances:** doxycycline hyclate, tylosin tartrate, vitamins.

**Target animals:** pigeons.

**Tylofarm:** Active against Gram-positive and Gram-negative microorganisms, protozoa and large viruses, clostridia, brucellosis, rickettsiae, hemophilics, spirochetes, chlamydia from the group of psittacosis and others.

**Active substances:** tylosin tartrate.

**Target animals:** pigeons.

License № 0022-2666/ 18<sup>th</sup> July 2016

**Metronidazol forte :** Acts on anti-protozoal on histomonas, trichomonas, lamblia, amaebies. It has a systemic antiprotozoal effect. Its toxicity in birds is low.

**Active substance:** metronidazol.

**Target animals:** pigeons.

**Oxytetravit:** It is used for treatment and prevention of infectious synovitis and infectious airsacculitis, for the treatment of pigeon cholera, other bacterial infections, the causes of which are sensitive to oxytetracycline.

**Active substances:** oxytetracycline hydrochloride, vitamins.

**Target animals:** pigeon.

**Ornivit:** Intended for treatment of mycoplasmosis, ornithosis, breathing problems.

**Active substances:** doxycycline hyclate, vitamins.

**Target animals:** pigeon.

**Streptomycin:** Used to treat pigeons of fowlpox, diarrhea of various kinds, in chronic salmonella, for the prevention and treatment of salmonella arthritis.

**Active substances:** streptomycin.

**Target animals:** pigeon.

**Sulfaguanidine:** It is used in gastrointestinal diseases of infectious nature.

**Active substances:** aminobenzene-sulfonylguanidine monohydrate.

**Target animals:** pigeons.

**Tylocycline + vitamins:** Used for the treatment of primary and secondary bacterial infections of the respiratory and gastrointestinal tract.

**Active substances:** tylosin, chlortetracycline.

**Target animals:** pigeons.

**Furaltadone 6:** One of the best treatments for bacterial infections (salmonella, e-coli), easy to use, very effective and affordable.

**Active substances:** furalthadone, vitamins.

**Target animals:** pigeons.

**Paramyxovir:** Used to treat salmonellosis, E-coli, bacterial infections of the gastrointestinal tract.

**Active substances:** furaltadone 10gr., colistin 5gr., chloramphenicol 7gr., and vitamins.

**Target animals:** pigeons and ornamental birds.

**Chloramphenicol:** Used against bacterial infections, caused by chloramphenicol-sensitive microorganisms, such as salmonellosis, respiratory and gastrointestinal tract infections, infectious cold, septicemia.

**Active substances:** chloramphenicol 5gr and vitamins.

**Target animals:** pigeon and ornamental birds.

**Ronidazole 10%:** Used for the treatment and prophylaxis of trichomoniasis and hexamitiasis (gangrene).

**Active substances:** ronidazole.

**Target animals:** pigeons and ornamental birds.

**Packages:** 10gr., 20gr., 100gr., 1kg.

**Ronifur /ronidazole + furaltadone/ :** Used for the treatment and prophylaxis of trichomoniasis, gangrene, e-coli, paratyphoid, coccidiosis, gastrointestinal infections, diarrhea.

**Active substances:** ronidazole, furantadone.

**Target animals:** pigeons and ornamental birds.

Packages: 10gr., 20gr., 100gr., 1kg.

**Sulfathiazole:** It acts against pneumococci, streptococci, staphylococci, pastorelly, e-coli. It is well absorbed from the digestive tract. It acts bacteriostatically.

**Active substances:** sulfathiazole.

**Target animals:** pigeons.

### **Liquid forms for internal use for domestic animals - anti-parasitic veterinary medical preparations.**

**Enrofloxacin 10% solution:** Treatment of infections, caused by the following enrofloxacin-sensitive bacteria in chickens: Mycoplasma gallisepticum, Mycoplasma synoviae, Avibacterium paragallinarum, Pasteurella multocida. Active substances: Entrofloxacin-10.0 g. Types of animals for which the veterinary medical preparations is intended: Broilers. Method and way of use: 10mg. enrofloxacin/ kg. body mass daily for 3-5 consecutive days. Packages: Enrofloxacin from 10 ml., Enrofloxacin from 1 l. Reg. No 0022-1814 / 13.07.2012

**Selenium E farm hydrazole** Painful conditions - muscular dystrophy and other myopathies in calves, horses, lambs, kids, pigs, dogs, rabbits and turkeys; in muscular dystrophy, exudative diathesis and encephalomatosis in chickens; asymptomatic sterility in females, habitual abortions, disturbed spermatogenesis (oligospermia) in male breeders; in cardiac microangiopathy ("mulberry heart

disease"), hepatic hepatitis, yellow fat disease, exudative diathesis and pig MMA syndrome, prevention of iron intoxication of pigs on ferric-dextran treatment; for increasing the immune protection of bacterial and viral diseases, under stress conditions. For treatment of rickets in adolescent animals, osteoporosis in adults. Content of active substances in 100 ml. product: -Tocopheroli acetat – 2.500g., Natrii selenis – 0.063g., Cholecalciferol – 0.060g. Types of animals for which the veterinary medical preparations is intended: birds, cattle, sheep, goats, pigs, dogs and rabbits. Natrii selenis – 0.063 Packages: Selenium E farm hydrozole 20 ml, Selenium E farm hydrozole 50 ml, Selenium E farm hydrozole 100 ml, Selenium E farm hydrozole 1 l, Selenium E farm hydrozole 5 l.  
Reg. № 0022-1439/ 12<sup>th</sup> October 2015.

**Pharmakox:** Used for the treatment of coccidiosis in hens and turkeys. Active substances: Toltrazuril 2.5 g/ 100 ml. Types of animals for which the veterinary medical preparations is intended: hens and turkeys. Packages: Pharmakox of 10 ml, Pharmakox of 100 ml, Pharmakox 1l.  
Reg. № 0022-1586/ 17<sup>th</sup> May 2016.

**Piperazine 20%:** Oral solution. Therapeutic indications: For the treatment of pigs ascaridosis, ascaridosis and capillary disease in birds. Types of animals for which the veterinary medical preparations is intended: pigs and birds. Packages: Piperazine 20 % of 100 ml. - Piperazine 20 % of 200 ml. - Piperazine 20 % of 200 ml. - Piperazine 20 % of 500 ml., Piperazine 20 % of 1,0 l. Reg. № 0022-2499/ 31<sup>st</sup> March 2015.

#### **Albendazole 10%**

A broad spectrum antiparasitic agent for controlling mature and immature forms of internal parasites /worms, pulmonary parasites, tapeworms, adult hepatic methyl/. Target animals: big ruminants /cows, cattle/, sheep and goats. Active substances: Albendazole 100 mg/ml. Packages: 50 ml, 100 ml, 200 ml, 500 ml, 1 l, 5 l.  
Reg. № 0022-2736/ 25<sup>th</sup> May 2017.

**Maxivit:** Accelerates growth, increases the productivity and resistance of the body, assists the proper flow of metabolic processes.

Active substances in 100 ml: vitamin A, D3, E, B1, B2, B6, B12, K3.

Target animals: pigeons, birds, exotic animals.

**Vitamin E hydrozole:** Oral emulsion. It is important for the fertility of both females and male animals and birds. Improves the functions of the immune system and others. Intended for: birds, calves, lambs, pigs, pigeons, dogs and rabbits.

Content: vitamins, pro-vitamins, vitamin E.

**AD<sub>3</sub>E hydrozole:** Complementary liquid fodder to support productivity and reproductive system.

Target animals: birds, pigs, rabbits, cattle, horses.

Content: Vitamins and pro-vitamins, Vit. A, D<sub>3</sub>, E.

**AD<sub>3</sub>EC hydrozole:** Complementary liquid fodder to support productivity and reproductive system. Content: Vitamins and provitamins, Vit. A, D<sub>3</sub>, E, C. Target animals: birds, pigs, rabbits, cattle, horses.

## **Liquid forms for internal use in exotic animals and pigeons**

### **Selenium E farm**

Used for encephalomania in pigeons. Exudative diathesis, muscular and cardiac dystrophy, rhinitis and osteomalacia, skin diseases in pigeons and exotic birds. Stimulates fertility, increases growth. Content of active substances in 100 ml. product: a-Tocopheroli acetat – 2.500 g., Natrii selenis – 0.063 g.

Types of animals for which the veterinary medical preparations is intended: pigeons and exotic birds.

### **Piperazine**

In ascariidosis and capillary disease in pigeons.

Content of active substances in 100 ml product: Piperazine hexahydrate – 20g.

Types of animals for which the veterinary medical preparations is intended: pigeons. Packages: 100 ml, 200 ml.

**Pharmakox**

Acts as a coccidiostat, destroying all the intracellular forms of the monogenic development of coccidia – morula micros and macro gametes, extracellular forms.

Active substances: Toltrazuril 2.5 g/ 100 ml.

Target animals: Pigeons. Packages: 10 ml, 100 ml, 1 l.

**Enrofloxacin**

For the treatment of colibacillosis, salmonellosis, mycoplasmosis, chronic respiratory disease, infectious cold, staph infections.

Active substances: Enrofloxacin.

Target animals: pigeons, birds, chickens.

Packages: 10 ml, 100 ml.

**Maxivit**

Accelerates growth, increases the productivity and resistance of the body, assists in the proper flow of metabolic processes. Active substance in 100 ml: vitamin A, D3, E, B1, B2, B6, B12, K3.

Target animals: pigeons, birds, exotic animals.

**Veterinary medicine preparations for external use for the treatment of wounds and skin diseases****Ectolucyl spray**

It is used in case of myiasis, in foot rot and other ungulate diseases, dog scabies. Active substances: oxytetracycline hydrochloride, cypermethrin, salicylic acid. Intended for cattle, sheep, goats, horses and dogs. Packages 100 ml.

**Ectolucyl spray /pigeon/**

Acts insecticidally and acaricidally on flies, mosquitoes, lice, argasides, hypodermic larvae and other mites. It is applied to ear scabs in decorative bunnies, hairless spots caused by fetal ticks.

Active substances: oxytetracycline hydrochloride, cypermethrin, salicylic acid. Intended for pigeons, guinea pigs, decorative bunnies. Packages 100 ml.

**Neomycin spray**

Highly effective for the treatment of infected skin, mucous and traumatic injuries, and accidental and surgical wounds, dermatitis. Neomycin spray is an aerosol with an antimicrobial, anti-allergic and anti-inflammatory effect. Intended for pigeons, guinea pigs, decorative bunnies.

Packages 100 ml.

### **Ichthyol 10% spray**

Used for treatment of eczema, purulent dermatitis, abscesses, purulent wounds, furunculus, fistulae, ulcers, burns and frostbite. Active substances: ichthyol. Intended for horses and dogs.

Packages 100 ml.

Reg. № 0022-1813/13<sup>th</sup> July 2012.

### **Neocubatul spray**

Promotes granulation and epithelization. Applied to wounds, burns, castration, dermatitis, wet and dry eczema, dermatomycosis, umbilical cord treatment. It has a repellent action. Active substances: Pix Liquida – 15%. Intended for exotic animals and pets - hamsters, pigeons, guinea pigs, mini bunnies, ornamental birds. Packages 140 ml.

### **Oxytetra spray**

Highly effective for treatment of infected skin, mucosal and traumatic lesions, accidental and surgical wounds, dermatitis, hooves, chronic ulceration of the hoof in cattle, sheep and goats. Intended for cattle, sheep, goats, horses, pigs and dogs. Packages 200 ml.

Reg. № 0022-1927/ 07<sup>th</sup> January 2013.

### **Oxytetra spray /pigeon/**

Oxytetra spray - highly effective for treatment of infected skin, mucous and traumatic injuries and accidental and surgical wounds, dermatitis. Active substances: oxytetracycline hydrochloride. Intended for pigeons, guinea pigs, decorative bunnies. Packages 200 ml.

### **Tetraneocort spray**

Highly effective in treatment of superficial accidental and surgical wounds, in deep-bodied injuries, in the absence of necrotic and squamous tissues and in a timely surgical treatment, interdigital dermatitis and foot rot. Active substances: oxytetracycline hydrochloride. Intended for cattle, sheep, goats, horses, pigs and dogs. Packages 200 ml.

Reg. № 0022-1871/ 28<sup>th</sup> September 2012.

### **Exefarm spray**

Intended for treatment of skin diseases, eczema, mycoses, septic wounds, ulcers, abscesses, decubitus, etc. Active substances: sulfathiazole, salicylic acid.

Intended for pigeons.

### **Chayvet Lavenda**

Acts antiseptically, soothes inflammation and promotes growth and healthy skin. It restores the shine of the hair cover and keeps the skin clean, supports the natural processes of wound healing. Removes itching, reduces pain. Effective against insects. Active substances: tea tree extract, juniper oil, lavender oil. Intended for dogs.

### **Chayvet Terpenta**

It has an anesthetic, immune-stimulating effect on the skin. Improves regeneration and re-epithelization. It is effective against insects. Soothes itching and pain. Active substances: tea tree extract – 10%. Intended for large ruminants, sheep, goats, pigs, horses, dogs.

### **Granufarm spray**

It is applied to fresh infected wounds, ulcers, eczemas, dermatitis, mucus, ulcers and fistulae of the hoof. Active substances: salicylic acid, ethacridine lactate, tryptaflavine, methylene blue. Intended for pigeons and exotic animals.

### **Neobacin spray**

Used for treatment of skin infections after traumatic injuries, cuts, burns, tears, wet wounds. Post-operative interventions.

**Active substances:** neomycin, zinc bacitracin.

**Target animals:** pigeons, guinea pigs, decorative bunnies.

### **Iodine spray**

Used for disinfection of surgery areas, for wound healing (around them). It acts as a bactericidal, sporocidal, virucidal, antimycotic, acaricidal (in fetal ticks). Active substances: iodine, potassium iodide. Intended for pigeons.

### **Neobacin emulsion**

Soothes itching and pain, has an antifungal effect. Suitable for insect bites, pain and itching in the ears. Strengthens recovery process. Used for the treatment of skin injuries, cuts, tears, after

surgical interventions. Content: neomycin, zinc bacitracin, mint and caramel oil. Target animals: pigeons, guinea pigs, rabbits. Packages: 100 ml.

### **Granufarm liquid**

Alcohol solution for skin. Used for fresh infected wounds, decubital wounds and ulcers, eczema, dermatitis, sores, ulcers and hoof figurines. Applies to the skin. For companion animals, exotic animals and horses, pigeons. Glass vials x 50 and 100 ml.  
License № 0022-1983/ 01<sup>st</sup> April 2013.

### **Exefarm C**

It is intended for treatment of skin diseases, eczema, mycoses, septic wounds, ulcers, abscesses, decubitus, etc. Active substances: sulfathiazole, salicylic acid, resorcinol.  
Target animals: pigeons.  
Packages: 50 ml, 100 ml.

### **Ichthyol drops**

It is used to treat eczemas, purulent dermatitis, abscesses, purulent wounds, furunculus, fistulas, ulcers, burns and frostbite. It has a beneficial effect on dermatological diseases, keratolytic, antiparasitic, antifungal, antimicrobial action, reduces itching, exudation and painful sensitivity. Active substances: ichthyol. Target animals: horses and dogs.

### **Ocolofarm eye drops**

dog/cat – used for treatment of inflammatory, allergic and bacterial eye diseases such as conjunctivitis, keratitis, blepharitis, diabocysts. Target animals: dogs and cats. Active substances: Gentamicin /as sulphate/ 3.0 mg/ ml, Dexamethasone /as sodium phosphate/. Packages 5 ml.  
Reg. № 0022-2737/ 25<sup>th</sup> May 2017

### **Ocolofarm eye drops**

Pigeons/ exotic animals - in keratitis, conjunctivitis, blepharitis, keratoconjunctivitis and others. Anti-allergic and preventative against infections. Active substances: gentamicin sulfate, prednisolone acetate. Intended for: hamsters, guinea pigs, mini bunnies and other exotic pets.

### **Gentamast**

Intramammary suspension. It is intended for treatment of clinical and subclinical mastitis caused by gentamicin-sensitive microorganisms, such as E. coli /coliforms/, staphylococci and streptococci. Active substances: gentamicin sulphate. Target animals: cows.  
Packages: syringes 10 gr.

**Granufarm liquid**

Alcohol solution for the skin. Used for fresh infected wounds, decubital wounds and ulcers, eczema, dermatitis, sores, ulcers and hoof figurines. Applies to the skin. For companion animals, exotic animals and horses, pigeons. Glass vials x 50 ml and 100 ml.

License № 0022-1983/ 01<sup>st</sup> April 2013.

**Oxytetra powder**

Antibiotic powder for external use. Target animals: pigeons, guinea pigs, decorative bunnies. Used for the treatment of superficial and deeper wounds on the skin. Active substances: oxytetracycline hydrochloride.

**Ecto eczema**

Emulsion for external use. For treatment of skin diseases, allergic dermatitis, wounds during the first phase, burns with pneumatic dermatitis, acne and others. Active substances: neomycin sulphate, prednisolone, precipitated sulfur, zinc oxide. For pigeons, guinea pigs, hamsters, mini bunnies. Vial: 100 ml.

**Dog eczema**

A skin emulsion for external use for dogs and cats. Intended for treatment of skin diseases - allergic dermatitis, wounds in initial stage, burns, pyoderma dermatitis, impetigo in the dog, acne in the dog and cat, and superficial pyoderma of the skin folds (facial, oral, scrotal and vulvar).

Active substances: neomycin sulphate, prednisolone, precipitated sulfur, zinc oxide. Vial 100 ml.

License № 0022-2609/ 25<sup>th</sup> September 2015

## **Vitamins for internal use in the form of powders /sachets/ for pets.**

### **Vitatonix**

Vitamin complex as a complementary fodder to the daily food portion for animals. Contents: dextrose, water-soluble vitamin module. For all animal species. Packages from: 10 g., 20 g., 50 g., 100 g., 200 g., 1 kg.

### **Ovostim**

Vitamin complex as a complementary fodder to the daily animal portion. Contents: dextrose, water-soluble vitamin module. For all animal species. Packages from: 1 kg., 20 kg.

### **Polivit**

Vitamin complex as a complementary fodder to the daily animal portion. Contents: dextrose, water-soluble vitamin module. Intended for all animal species. Packages from: 10 g., 50 g., 100 g., 200 g., 500 g., 1 kg.

## **INSECTICIDAL PREPARATIONS**

### **Cypermethrin**

Insecticide for professional and domestic use to combat cockroaches, fleas, lice, ticks, spiders, ants, etc. In homes, hotels, farm buildings, stables, hens, pastures. For spraying of hotels, dwellings, stables, savannas, sheep, goats, cows, pigs, birds, dogs and cats. Active substances: cypermethrin. Packages from: 5 ml., 9 ml., 10 ml., 20 ml., 1 l.

License № 022-1921/ 07<sup>th</sup> January 2013

### **Ectomin**

Insecticide for professional and domestic use to combat cockroaches, fleas, lice, ticks, spiders and ants, etc. In homes, hotels, farm buildings, stables, hens, pastures. For spraying of hotels, dwellings, stables, savannas, sheep, goats, cows, pigs, birds, dogs and cats. Active substances: cypermethrin 10%. Packages from: 5 ml., 9 ml., 10 ml., 20 ml., 1 l.

License № 0041-2/ 28<sup>th</sup> November 2016

### **Ectociper**

Insecticide for professional and domestic use to combat cockroaches, fleas, lice, ticks, spiders and ants, etc. In homes, hotels, farm buildings, stables, hens, pastures. For spraying of hotels, dwellings, stables, savannas, sheep, goats, cows, pigs, birds, dogs and cats. Treating the places where the insects live and hide. Active substances: cypermethrin 10 %. Packages from: 5 ml., 9 ml., 10 ml., 20 ml., 50 ml., 100 ml., 1 l.

License № 0040-2/ 28<sup>th</sup> November 2016

### **Favorit farma**

Against cockroaches, fleas, lice, spiders, ants, beetles, colorado beetles and other pests in homes, hotels, farm buildings, stables, hens, pastures 1ml. of the emulsion dissolves in 2-3 liters of water for washing and spraying the premises of the animal - savannas, pastures, residential buildings.

### **Nuvan farma**

Used for invasions of ticks, lice, fleas, flies, ants, cockroaches and other ectoparasites that carry infections on your pets. For bathing dogs. The places where the insects live and hide are treated. Active substances: dichlorophos. Packages from: 9 ml., 10 ml., 20 ml., 1 l., 250 ml., 500 ml.

Reg. № 0022-2193/ 07<sup>th</sup> March 2014

### **Deltafarm**

Concentrate for skin solution. Prevention and treatment of fetal ticks, fleas, tick lice, flies. Intended for cattle, sheep, dogs. Bathing application, against external parasites. Dosage 1-2 ml/l. water. Use the same solution to sprinkle the rooms, savannas or places where all the parasites that carry infections on your pets - chickens, lice, fleas, lice and others are hiding. Active substances: deltamethrin. Packages: 10 ml., 20 ml., 50 ml., 1 l.  
Reg. № 0022-2618/ 18<sup>th</sup> December 2015

### **Deltametrin Colombo**

In invasion with chickens, ticks, lice, fleas, flies, ants, cockroaches and other ectoparasites that carry on pets. For bathing against external parasites. Dosage - 1 ml/liter of water. With the same solution, sprinkle the rooms, the sheds, the pit, or the places where all the parasites that carry the infestations on the pets are hiding - chickens, ticks, fleas, lice and other. Target animals – exotic birds, pigeons, exotic animals. Active substances: deltamethrin 5 g. Packages: 10 ml., 20 ml., 50 ml., 1 l.

### **Tetrazine**

Used against creeping and flying insects with three active ingredients: cypermethrin, tetramethrin and piperonyl butoxide, which makes it even more powerful and effective in destroying the pests. Active substances: Cypermethrin 10 g./100 ml., Tetramethrin 2 g./100 ml., Piperonyl butoxide 5g./ 100 ml. Packages from: 9 ml., 10 ml., 20 ml., 50 ml., 100 ml., 1 l. License № 1916-1/ 13<sup>th</sup> April 2016.

### **Triokill**

Antibiotic to control cockroaches, ticks, ants, flies and mosquitoes indoors and outdoors in homes, hospitals, catering establishments, hotels, schools and more. Category - mass. Concentration of the working solution: crawling - 3 piperonyl butoxide. Packages: 9 ml., 10 ml., 20 ml., 50 ml., 100 ml., 1 l.  
License № 2042-1/ 28<sup>th</sup> November 2016

### **Cypermethrin farma /animals/**

Invasions of cypermethrin sensitive parasites: For treatment of tick, flea, lice and flies invasion in cattle, sheep, dogs and cats. For scabies treatment. Active substances: cypermethrin. Target animals: cattle, sheep, dogs and cats.  
License № 0022-1921/ 07<sup>th</sup> January 2013

### **Nuvan colombo /pigeons/**

For invasions of ticks, lice, fleas, flies, ants, cockroaches and other ectoparasites that carry infections on pets. For bathing against external parasites. Target animals: exotic birds, pigeons, exotic animals. Active substances: deltamethrin.

### **Carbaril /skin solution /**

Invasions of dermanyssus gallinae, ticks, lice, bulls, flies, ants, cockroaches and other ectoparasites that carry on pets. For bathing against external parasites. Target animals: exotic birds, pigeons, exotic animals. Active substances: deltametrin.

### **Diacidol**

For treatment of invasion by dermanyssus gallinae, ticks, fleas, lice, flies, scabs, where the insects hide and live. Intended for cattle, sheep, goats, pigs and dogs. Active substances: diazinon. Packages: 9 ml., 10 ml., 20 ml., 1 l.

Reg. № 0022-1872/28<sup>th</sup> September 2012.

### **Permetrin spot on**

For treatment of flea and tick invasion. Intended for dogs. Active substances: permetrin. Packages: 10 ml.

License № 0022-1761/08<sup>th</sup> May 2012

### **Proteyt**

Biocide against fleas, flies, cockroaches, mosquitoes, ants, bugs, moths and other insects that cause diseases in exotic animals. Active substances: dichlorophos and cypermethrin. Packages: 10 ml.

### **Aycol colombo**

Biocides against fleas, flies, cockroaches, mosquitoes, ants, bugs, moths and other insects that carry infections on pets. Active substances: dichlorophos and cypermethrin. Packages: 10 ml.

### **Bendita colombo**

Intended for combating fleas, flies, cockroaches, mosquitoes, ants, bed bugs, moths and other insects. Target animals: exotic birds and animals, pigeons. Active substances: cypermethrin. Packages: 10 ml.

### **Carbatril**

Intended for combating fleas, flies, cockroaches, mosquitoes, ants, bed bugs, moths and other insects. Target animals: exotic birds and animals, pigeons. Active substances: cypermethrin. Packages: 10 ml.

## **Veterinary medical preparations for control over ticks, fleas, lice and others, in the form of powders, sprays and shampoos for pets**

### **Opigard**

POWDER FOR DOGS: Skin powder intended for the deworming of dogs of all ages invasive with external parasites (fleas, lice, ticks, cosmodes). After treatment, protection from reinfusion lasts 2-3 weeks. Active substances: Carbaril. Packages: 40 gr. and 80 gr.

### **Break Pro shampoo**

Exterminate external parasites in dogs and cats. Active substances: propoxur. Intended for dogs and cats. Packages 250 ml.

License № 0022-1620/ 25<sup>th</sup> May 2016

### **Break pro powder**

Powder to exterminate external parasites in dogs and cats. It acts against fleas, lice, ticks, cosmodes, etc. Active substances: Propoxur. For external use on skin. Packages 40 gr. and 80 gr.

License № 0022-1621/ 25<sup>th</sup> May 2016

### **Opigard creeping powder**

It is used in invasion with chickens, ticks, lice, fleas, flies, ants, cockroaches and other ectoparasites that carry infections. Contents: carbaril 2. Packages 40 gr. and 80 gr.

### **Permetrin shampoo dog/cat**

It is applied externally to fight fleas, lice and ticks. Active substances: permetrin. Intended for animals: dogs and cats. Packages: 250 ml.

License № 0022-1922/07<sup>th</sup> January 2013

### **Permetrin shampoo dog**

It is applied externally to an invasion of fleas, lice and ticks. Active substances: permetrin. Intended for animals: dogs. Packages 250 ml.

### **Permetrin shampoo cat**

External application to fleas, lice and ticks. Active substances: permetrin. Intended for animals: cats. Packages 250 ml.

**Pics Ecto shampoo tar**

Insecticide shampoo. In scabies, invasion of fleas and lice, in dermatomycoses; mosquito repellent. Target animals: dogs. Active substances: pine tar. Packages: 250 ml.  
Permission No 0022-1739 / 05.04.2012

**Ectomin spray**

Highly effective spray against external parasites. Invasions of cypermethrin-sensitive parasites. Against flies, cockroaches, mosquitoes, ants, and others. Field of application: dwellings, hotels, schools, warehouses, production facilities, restaurants, kindergartens, farm buildings and other.

**Opigard spray dog**

Insecticide spray for pets, applied to the skin to exterminate external parasites. Against fleas, lice, ticks, mites, chickens, cosmodes and others. Active substances: carbaril. Intended for: dogs.

**Ectomin spray dog/ cat**

Spray against external parasites. Against fleas, lice, ticks, mites, chickens, cosmodes, and others.

## **Veterinary medical preparations for control over ticks, fleas, lice and others, in the form of powders, sprays and shampoos for pigeons and exotic animals**

### **Opigard decorative animals powder**

Used for dusting against external parasites, chickens, ticks, fleas, lice and others. For exotic birds, pigeons, decorative bunnies, guinea pigs. Contents: carbaril. Packages: 40 gr. and 80 gr.

### **Gard powder**

Antiparasitic powder for pigeons and exotic animals. Insecticidal powder to combat external parasites. Active substances: carbaril. Packages: 40 gr., 80 gr.

### **Nuvan colombo spray**

For spraying against external parasites. The same solution sprays the rooms where all the parasites that carry infections on your pets are hiding. Active substances: dichlorphos. Target animals: pigeons, decorative animals.

### **Carbaril spray**

In invasion of chickens, ticks, fleas, flies, ants, cockroaches and other ectoparasites that carry infections on your pets. Active substances: cypermethrin. Target animals: pigeons.

## **Milk replacers and complementary fodder**

**Extra milk**

Milk replacer for calves and lambs after 7 days of age, supplementing feed. Ingredients: wheat flour, soybean powdered, whey powder, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages from: 1 kg., 3 kg., 5 kg. and 25 kg.

**Cavilak**

Milk replacer for calves and lambs after 7 days of age, supplementing feed. Ingredients: wheat flour, soy flour, whey powder, pectin, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages from: 1 kg., 3 kg., 5 kg. and 25 kg.

**Lacto-len**

Milk replacer for calves and lambs after 7 days of age of linen flour, supplementing feed. Ingredients: wheat flour, soy flour, whey powder, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages from: 1 kg., 3 kg., 5 kg. and 25 kg.

**Mixomec**

Milk replacer for calves and lambs after 7 days of age, supplementing feed. Ingredients: wheat flour, soy flour, whey powder, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages: 1 kg., 3 kg., 5 kg., 25kg.

**Milki lac**

Milk replacer for calves and lambs after 7 days of age supplementing feed. Ingredients: wheat flour, soy flour, whey powder, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages: 1 kg., 3 kg., 5 kg., 25 kg.

**Pecto-lac**

Milk replacer for calves and lambs after 7 days of age with pectin supplementing feed. Ingredients: wheat flour, soy flour, whey powder, pectin, vanilla scent, sodium bicarbonate. Additives: vitamins, provitamins and chemically well-defined substances with similar effect. GMO free. Packages from: 1 kg., 3 kg., 5 kg. and 25 kg.

**Favorite for lamb and goatling**

Complementary feed for lambs and kids. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for broilers**

Complementary feed for adolescent chicks. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for laying hens**

Complementary feed for laying hens. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vitamins. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for small pigs**

Complementary feed for small pigs. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for sheep, goats**

Complementary feed for sheep, goats. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg., 5 kg.

**Favorite for pigs for fattening**

Complementary feed for pigs for fattening. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for sows and boars**

Complementary feed for sows and boars. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Favorite for calves**

Complementary feed for calves. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 500 gr., 1 kg. and 5 kg.

**Agne stim**

Complementary feed for lambs and kids. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 5 kg. and 25 kg.

**Coco stim**

Suitable for inclusion in the feed of laying hens. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 5 kg., 25 kg.

### **Krave stim**

Complementary feeding stuff for lactating cows. It has a multifaceted effect on the body. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. Packages: 5 kg. and 25 kg.

### **Pile stim**

Complementary feed for adolescent chickens. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 5 kg. and 25 kg.

### **Prasi stim**

Complementary feed for pigs. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 5 kg.;25 kg.

### **Tele stim**

Complementary feed for calves. Ingredients: calcium carbonate, sodium bicarbonate, vitamin-mineral premix. GMO free. Packages: 5 kg. and 25 kg.

### **Lactica**

Used for lactating cows, sheep, goats and buffaloes. Contains aniseed flavor. Calcium carbonate, sodium bicarbonate, vitamin-mineral premix; aniseed flavor. Analytical contents: Calories - 21.0%, Sodium - 12.0%; Phosphorus - 0.45%. GMO free. Packages from: 1 kg., 5 kg. and 25 kg.

### **Dikalciphos**

Complementary mineral feed for horses, cows, sheep, goats, small pigs, pigs for fattening, sows and boars, calves, kids, lambs, laying hens, chickens, dogs and cats. Ingredients: dicalcium phosphate, calcium carbonate. GMO free. Packages from: 500 gr., 1 kg., 5 kg., 25 kg.

### **Energy Hens**

Energy concentrate, supplementing feed for high-fat laying hens. Ingredients: sunflower expeller, palm fat, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent. Analytical contents: Protein-14.00%; Fat-42.00%; Fiber - 1.30%; Ash - 8.50%; Sodium - 0.56%; Magnesium - 0.08%; Phosphorus-0.13%. GMO free. Packages from: 500 g, 1 kg.

### **Energy Cows**

Energy concentrate supplementing feed for lactating cows. Ingredients: Protected palm fat, sunflower expeller, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, aniseed flavor. Analytical contents: Protein 6,90%; Fat 51.00%; Fiber 1.61%; Ash 16.50%; Calcium 10,20%; Sodium 0.56%; Magnesium 0.08%; Phosphorus 0.13%. GMO free. Packages: 500 g, 1 kg.

### **Energy pigs**

Energy concentrate, supplementing feed for high-fat pigs. Ingredients: sunflower expeller, palm fat, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent. Analytical contents: Protein-14.00%; Fat-42.00%; Fiber - 1.30%; Ash - 8.50%; Calcium - 10,20%; Sodium - 0.56%; Magnesium - 0.08%; Phosphorus-0.13%. GMO free.

Packages from: 500 g, 1 kg.

### **Premium laying hens**

Protein bioconcentrate, supplementary feed for laying hens.

Ingredients: sunflower expeller, soy flour, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent, antioxidants. Analytical contents: Protein-22.00%; Fat-12.00%; Fiber - 5.22 %; Ash - 31.62 %; Calcium - 11,51 %; Sodium - 2.27 %; Phosphorus-0.55 %; Lysine - 1.98%, Methionine - 0.91 %. GMO free. Packages: 500 g, 1 kg.

### **Premium cats**

Protein-vitamin mix, complementing cat food. Ingredients: Processed animal protein cat. 3, fish flour, calcium carbonate, vitamin-mineral premix. Analytical contents: Protein 38.00%; Fat 8.20%; Fiber 0.85 %; Ash 45.40 %; Calcium 14,82 %; Phosphorus 2.41 %; GMO free. Packages: 500 g, 1 kg.

### **Premium cows**

Protein bioconcentrate supplementing feed for lactating cows. Ingredients: sunflower expeller, soy flour, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent, antioxidants. Analytical contents: Protein – 19.10%; Fat - 18.60%; Fiber - 2.79%; Ash - 30.54 %; Calcium - 11,51 %; Sodium - 2.27 %; Magnesium - 0.30 %; Phosphorus - 0.20%. GMO free. Packages from: 500 g, 1 kg., 5 kg.

### **Premium dog**

Protein-vitamin mix, complementing dog food. Ingredients: Processed animal protein category 3, fish flour, calcium carbonate, vitamin-mineral premix. Analytical contents: Protein 31.40 %; Fat 11.60%; Fiber 1.75 %; Ash 49.20 %; Calcium 16,05 %; Phosphorus 2.80 %; GMO free. Packages: 500 g, 1 kg.

### **Premium chicken**

Protein bioconcentrate supplementing feed for chickens broilers. Ingredients: sunflower expeller, soy flour, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent,

antioxidants. Analytical contents: Protein 27.35 %; Fat 18.60%; Fiber 5.65 %; Ash 16.67 %; Calcium 5,75 %; Sodium 2.30 %; Phosphorus 0.65 %; Lysine 1.49%; Methionin 0.62%. GMO free. Packages: 500 g, 1 kg., 5 kg.

### **Premium pigs**

Protein bioconcentrate supplementing feed for pigs for fattening. Ingredients: sunflower expeller, soy flour, calcium carbonate, sodium bicarbonate, vitamin-mineral premix, vanilla scent, antioxidants. Analytical contents: Protein – 27.35 %; Fat - 18.60%; Fiber - 5.65 %; Ash - 16.67 %; Calcium - 5,75 %; Sodium - 2.30 %; Magnesium – 0.65%; Lysine – 1.49%; Methionin – 0.62 % .GMO free. Packages from: 500 g, 1 kg., 5 kg.

### **Vitatonic**

Vitamin complex as a complementary feed to the daily ration of animals. Ingredients: dextrose, water-soluble vitamin module. For all animal species. Packages from: 10gr., 20 gr., 50 gr, 100 gr., 200 gr., 1 kg.

### **Ovostim**

Application: dwellings, hotels, schools, warehouses, production facilities, restaurants, kindergartens, farm buildings and other.

## **Natural bee products**

### **Oxalic acid**

Natural product for the control of varroatosis. Oxalic acid occurs naturally in beet leaves and as potassium hydrogen-oxalate in sorrel and rhubarb. The action on the mite is that it reduces his sucking ability and it dies of hunger. Efficiency in the mite can reach up to 99%. It is applied

once a year when there is no shot. Mode of action - when the bees are licked, the active substance falls into the haemolymph and hence falls into the mites that suck.

### **Thymol**

It is a natural product and is considered to be a biological control method that causes the bees to be cleaned. In addition, vapors mash up the mite to the extent that it falls to the bottom and even leaves the hive, and the surviving ticks lose for some time the ability to multiply. Acts by evaporation and is applied directly to the hive. Once the thymol powder has been applied, the honeycomb should not be opened to prevent the vapor from spreading. In overdose and at very high temperatures, bees may leave the hive. Packaging: 10 gr., 50 gr., 100 gr.

## **Tablets**

### **Enrofloxacin**

Used for the treatment of colibacteriosis, salmonellosis, mycoplasmosis, staphylococci, pasteurellosis and others. In case of gastrointestinal and urogenital infections caused by enrofloxacin-sensitive bacteria.

**Active substances:** enrofloxacin. Intended for pigeons and decorative bunnies.

**Enrofloxacin tablets** –package 20 pc. and 30 pc. of 750 mg.

### **Vitafur**

It is used to treat intestinal, respiratory and urogenital infections. **Active substances:** neomycin, oxytetracycline, furaldodone. Intended for pigeons and decorative bunnies.

**Vitafur tablets in package:** 20 pc. and 30 pc. of 750 mg.

### **Doxymulin**

It is used to treat primary and secondary bacterial infections of the respiratory and gastrointestinal tract caused by Gram + and Gram - microorganisms. **Active substances:** doxycycline, thiamulin.

**Doxymulin tablets in package:** 20 pc. and 30 pc. of 750 mg.

### **Metronidazole**

Acts anti-protozoal on histomoniasis, trichomoniasis, lamplius, amebi.

**Active substances:** metronidazole. Intended for pigeons and decorative bunnies.

**Metronidazole tablets in package:** 20 pc. and 30 pc. of 750 mg.

### **Sulfaguanidine**

It is used to treat gastrointestinal diseases, coccidiosis in exotic birds, pigeons and decorative rabbits. **Active substances:** sulfaguanidine. Intended for pigeons and decorative rabbits.

**Sulfaguanidine tablets in package:** 20 pc. and 30 pc. of 750 mg.

### **Enterogard**

Used to treat: colibacterial, salmonellosis, mycoplasmosis, staphylococci, pasteuriculosis and other. **Active substances:** metronidazole, furaltadon, oxytetracycline. Intended for pigeons and decorative rabbits.

**Enterogard tablets in package:** 20 pc., and 30 pc. of 750 mg.

### **Levafarm**

Used to treat gastrointestinal and pulmonary nematodes in pigeons and decorative rabbits. **Active substances:** levamisole hydrochloride. Target animals: pigeons and decorative rabbits. **Levafarm tablets package:** 30 pc. and 50 pc. of 23 mg.

### **Tilodoxyn**

Used to treat primary and secondary bacterial infections for the respiratory and gastrointestinal tract. **Active substances:** doxycycline, tylosin. Target animals: pigeons and decorative rabbits.

**Tilodoxyn tablets in package:** 50 pc. and 100 pc. of 15 mg.

### **Tilociklin**

A combination of two broad-spectrum antibiotics. For the treatment of primary and secondary bacterial infections of the respiratory and gastric-intestinal tract. **Active substances:** chlortetracycline, tylosin. Intended for pigeons and decorative rabbits.

**Tilociklin tablets package:** 50 pc. and 100 pc. of 15 mg.

### **Furaltadone**

Used to treat primary and secondary bacterial infections for the respiratory and gastrointestinal tract. **Active substances:** furalthadone. Intended for pigeons and decorative rabbits. **Furaltadone tablets package:** 20 pc. and 30 pc. of 750 mg.

#### **Polivit /dog-cat/**

Used for prevention of avitaminosis and general strengthening of the body. A complex of vitamins that improve appetite, increase the body's resistance, increase immune protection, provide healthy skeleton, healthy teeth, healthy skin and hair, good vision. **Active substances:** vitamin module. **Target animals:** dogs and cats. **Tablets in package of:** 20 pc. and 30 pc. of 750 mg.
